PROFILE SUMMARY

Engineering Graduate with 4.8 years of industry experience, including 3.1 years in Manual Testing. Skilled in Web Automation using Selenium WebDriver and proficient in object-oriented programming. Well-versed in Page Object Model (POM) and data-driven frameworks. Experienced with Agile methodologies and familiar with XPath, CSS for object identification. Strong understanding of SQL queries and hands-on experience with Jenkins for continuous integration. Adept in using JIRA for defect tracking and experienced in various types of testing, including UAT and Sanity Testing.

SKILLS

Testing	: Manual Testing, Automation testing, Python with Selenium Web Driver
Languages	: Python, Java script
Frameworks	: Automation framework, POM, DDF
Integration Tool	: Jenkins
Bug Tracking Tool	: JIRA
Database Tool	: JSON, MySQL, MARIA DB
Designing Tool	: HTML and CSS, Java script, DOM
Source Code Tool	: GIT

WORK EXPERIENCE

COMPANY: CLARIVATE

(MAY- 2021 TO PRESENT)

DESIGNATION: CONTENT EDITOR

Project Name: Scholarly Item Master

Domain: Web of Science

Description:

Scholarly Item Master is a tool to build a system that allows for the generating the structured data from unstructured data. Publishers incoming source documents are in different formats (PDF, Print & XML). XML structured data formats allow us to automatically extract and auto-populate source item records with the help of Data science.

Roles and responsibilities:

- Coordinated with peers in the team for clarity on the requirements.
- Had Written Test Cases and executed them.
- Raise defect and follow up the defect in **JIRA**.
- Writing test cases for scenarios wherever the new Enhancement deploying in the tool.
- Executed test cases and analyzing and fixing the issues by coordinating with the QA.
- Maintaining tool functionality and analysis of test requirement

Automation Testing with Selenium Python in GUVI from (Dec 2023 – Apr 2024).

Project Name: Orange HRM

Domain: Management Tool

Automation Tools: Python, Selenium Web Driver, POM, Pytest.

Description: Orange HRM offers a comprehensive HR management system to suit all your business HR needs which can also be customized according to your requirements.

1. Testcases used Capstone project:

GitHub link for capstone project: <https://github.com/yogeswaran374/capstone-project-1>.

- To check the employee successfully login to Orange HRM portal with correct username and password.
- To validate the invalid employee can login to Orange HRM portal.
- Validate able to add new employee details in the PIM module.
- To verify able to edit the existing employee details in the PIM module.
- Finally, validate able to delete the existing employee details in the PIM module.

2. Testcases used Capstone project:

GitHub link for capstone project: <https://github.com/yogeswaran374/capstone-project-2>

- To check the forgot password link is working as expected on login page.
- To validate the Header elements on Admin page.
- To validate the Main menu elements on Admin page.

Roles & Responsibility:

- Understand the requirements in JIRA.
- Experience in test framework using POM and Selenium Web Driver.
- Prepare automation script for this can be automated.
- Well versed in test planning, test case design and defect management.
- Perform Functional Testing and Regression Testing.
- Create Automation Test Scripts and execution.
- Execution of test scripts using POM Framework.

EDUCATION

Bachelor of Engineering (Mechanical) from Chennai Institute of Technology, Chennai- (2015-2019)
